Cumulative Subject Index of Volumes 53–55
Numbers in **bold** denote volume

Acetic fermentation
  a kinetic model for growth of *Acetobacter aceti* in submerged culture, **54**, B15
Acetobacter aceti
  a kinetic model for growth of *Acetobacter aceti* in submerged culture, **54**, B15
Activation energy
  kinetics of zeolite-catalysed toluene isopropylation, **54**, 79
Adsorption
  chemical vapour deposition as a novel technique for catalyst preparation; modelling of active phase profiles, **53**, 13
  influence of intergranular transfer on the gravimetric determination of adsorption kinetics, **53**, 147
  diffusion and adsorption in zeolite Y and mordenite deactivated by propene oligomerization and hexane cracking, **54**, 115
  effects of adsorption on mass transfer in immobilization matrices, **54**, B1
Aeration
  observations on induced aeration in agitated slurries, **54**, 199
Aerobic mixed culture
  steady-state behaviour of an aerobic mixed culture growing on phenol in a continuous stirred reactor, **53**, B47
Agitated vessel
  observations on induced aeration in agitated slurries, **54**, 199
Alcoholic solutions
  reaction kinetics of COS with primary and secondary amines in alcoholic solutions, **55**, 53
Alkylation
  alkylation of naphthalene by propene with $BF_3.H_3PO_4$ catalyst in a three-phase system, **53**, 173
Amines
  reaction kinetics of COS with primary and secondary amines in alcoholic solutions, **55**, 53
Anaerobic
  comparison between dynamics and control performance of mesophilic and thermophilic anaerobic sludge digesters, **55**, B55
Anaerobic digestion
  kinetics of anaerobic digestion of cow manure with biomass immobilized on zeolite, **54**, B9
  kinetics of an anaerobic fluidized bed system used for the purification of fruit processing waste-water, **54**, B25
Antibodies
  characterization of antigen-coupled liposomes for homogenous immunoassay of polyclonal antibodies, **54**, B33
Azeotropic mixture
  azeotropic mixtures may be broken by membrane distillation, **54**, 87

Bacterial leaching
  mathematical modelling of batch and continuous bacterial leaching, **54**, 207

Batch distillation
  development and trends in simulation of continuous correction columns, **54**, 95
Benzyl chloride
  kinetics of the quaternizations of tertiary amines with benzyl chloride, **53**, 107
Bidisperse catalysts
  effectiveness of bidisperse catalysts with convective flow in the macropores, **55**, 81
Biomass
  kinetics of anaerobic digestion of cow manure with biomass immobilized on zeolite, **54**, B9
Bioreactor
  diffusional characteristics of a swelling gel and its consequences for bioreactor performance, **55**, B35
  upper limits to the stability characteristics of a continuous stirred-tank bioreactor fed with an inhibitory substrate, **55**, B47
  solution of hollow fibre bioreactor design equations: the case of power-law fluids, **55**, B73
Bubble column
  analogous description of the hydrodynamics of gas–solid fluidized beds and bubble columns, **53**, 89
  the behaviour of a bubble column at high throughputs. II. Radial voidage profiles, **53**, 115
  effect of vertical misalignment of liquid dispersion in bubble columns, **53**, 151
  gas hold-up and liquid mixing at low and intermediate gas velocities. I. Air–water system, **53**, 167
  rheological and morphological properties of submerged citric acid fermentation broth in stirred-tank and bubble column reactors, **53**, B35
  a non-parametric method for particle settling velocity determination in a slurry bubble column, **54**, 1
  liquid–solid mass transfer in a batch-packed bubble column, **54**, 51

Cadmium chelates
  mass transfer and kinetic behaviour of chelated cadmium solutions, **53**, 183
Catalase
  studies on the morphology of immobilized catalase, **55**, B41
Catalyst
  intraparticle diffusion and reaction kinetics as factors in catalyst particle design, **53**, 1
  chemical vapour deposition as a novel technique for catalyst preparation; modelling of active phase profiles, **53**, 13
  calculation of the kinetics of catalyst regeneration by burning coke following a temperature ramp, **54**, 35
  the effect of intraparticle convection on conversion in heterogeneous isothermal fixed-bed reactors with large-pore catalysts for first-order reactions, **54**, 41
  kinetics of zeolite-catalysed toluene isopropylation, **54**, 79

Catalytic reactor
the effects of oscillatory feeding of CO and O_2 on the performance of a monolithic catalytic converter of automobile exhaust gas: a modelling study, **53**, 47
Cavitation
microbial cell disruption: role of cavitation, **55**, B67
Chaos theory
deterministic chaos: a new tool in fluidized bed design and operation, **53**, 75
Chemical engineering
a revitalization of chemical engineering knowledge with fuzzy calculus, **54**, 155
Chemical equilibrium
predicting phase and chemical equilibrium using the convex hull of the Gibbs free energy, **54**, 187
Chemical reaction
development and trends in simulation of continuous correction columns, **54**, 95
Chromatography
separation of protein mixtures by continuous annular chromatography with step elution, **55**, B19
Coalescence
effect of liquid coalescing properties on mass transfer, heat transfer and hydrodynamics in a three-phase fluidized bed, **55**, 1
Column
experimental study of the hydrodynamics of an isothermal liquid film flowing inside tubular columns with corrugated walls, **54**, 23
Combustion
calculation of the kinetics of catalyst regeneration by burning coke following a temperature ramp, **54**, 35
Concentration
apparent yield stress in xanthan gum solutions at low concentrations, **53**, B41
Concentration fluctuations
OH concentration fluctuations in turbulent natural gas jet flames, **53**, 39
Connectionist system
the use of connectionist systems to reconcile inconsistent process data, **54**, 125
Control
comparison between dynamics and control performance of mesophilic and thermophilic anaerobic sludge digesters, **55**, B55
Convection
the effect of intraparticle convection on conversion in heterogeneous isothermal fixed-bed reactors with large-pore catalysts for first-order reactions, **54**, 41
Conversion
a grain size distribution model for non-catalytic gas–solid reactions, **53**, 25
the effect of intraparticle convection on conversion in heterogeneous isothermal fixed-bed reactors with large-pore catalysts for first-order reactions, **54**, 41
pyrolysis kinetics of waste PVC at high conversion, **55**, 87
Critical temperature
estimating the critical temperatures of inorganic substances, **54**, 147
Crystal growth
on the estimation of size-dependent crystal growth rate functions in MSMPR crystallizers, **53**, 125
an assessment of MSMPR crystallization kinetics data for systems modelled by size-dependent crystal growth rate functions, **55**, 69
Crystallization
on the estimation of size-dependent crystal growth rate functions in MSMPR crystallizers, **53**, 125
critical suspension conditions in stirred crystallizers, **55**, 45

Data correlation
a vapour pressure correlation for polar substances based on four-parameter corresponding states, **55**, 139
Deacidification
deacidification of grape musts by *Schizosaccharomyces* entrapped in alginate beads: a continuous-fluidized-bed process, **55**, B29
Deactivation kinetics catalyst
contributions to the calculation of coke deactivation kinetics. A comparison of methods, **55**, 125
Design
intraparticle diffusion and reaction kinetics as factors in catalyst particle design, **53**, 1
design strategy and process optimization for reactors with continuous transport of an immobilized enzyme, **53**, B1
solution of hollow fibre bioreactor design equations: the case of power-law fluids, **55**, B73
Desorption
microscopic modelling of electrothermal desorption, **53**, 157
Diffusion
intraparticle diffusion and reaction kinetics as factors in catalyst particle design, **53**, 1
diffusion and adsorption in zeolite Y and mordenite deactivated by propene oligomerization and hexane cracking, **54**, 115
diffusional characteristics of a swelling gel and its consequences for bioreactor performance, **55**, B35
Diffusion equation
an exact solution of the diffusion equation with shrinking, **55**, 135
Dispersion
a non-parametric method for particle settling velocity determination in a slurry bubble column, **54**, 1
Distillation
azeotropic mixtures may be broken by membrane distillation, **54**, 87
Distribution
a grain size distribution model for non-catalytic gas–solid reactions, **53**, 25
Dynamic modelling
deterministic chaos: a new tool in fluidized bed design and operation, **53**, 75
development and trends in simulation of continuous correction columns, **54**, 95
Dynamics
comparison between dynamics and control performance of mesophilic and thermophilic anaerobic sludge digesters, **55**, B55

Effective diffusivity
effects of adsorption on mass transfer in immobilization matrices, **54**, B1
Effectiveness factor
effectiveness of bidisperse catalysts with convective flow in the macropores, **55**, 81

Ejector
hydrodynamics and local mass transfer characteristics of gas–liquid ejectors, **53**, 67
Electrochemical reactors
kinetic study of the synthesis of poly(dibenzo-18-couronne-6) in an electrochemical reactor using a pulsed percolated porous electrode, **53**, 137
Electrolytic deposition
mass transfer and kinetic behaviour of chelated cadmium solutions, **53**, 183
Enzyme
enzyme mass transfer coefficient in a sieve plate extraction column, **55**, B1
Equation of state
an improved method for predicting the vapor–liquid equilibria of subcritical mixtures, **55**, 115
Ethanol
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
Evaporation
evaporation loss from solvent tanks, **55**, 61

Fermentation
rheological and morphological properties of submerged citric acid fermentation broth in stirred-tank and bubble column reactors, **53**, B35
macroapproach kinetics of ethanol fermentation by *Saccharomyces cerevisiae*: experimental studies and mathematical modelling, **54**, 221
Film
experimental study of the hydrodynamics of an isothermal liquid film flowing inside tubular columns with corrugated walls, **54**, 23
Fixed-bed reactor
modelling of K–Na exchange in fixed beds with highly concentrated feed, **54**, 17
the effect of intraparticle convection on conversion in heterogeneous isothermal fixed-bed reactors with large-pore catalysts for first-order reactions, **54**, 41
liquid–solid mass transfer in a batch-packed bubble column, **54**, 51
Fixed beds
tracer experiments in fixed beds: effects of flow maldistribution on the estimation of transport kinetic parameters, **53**, 193
Flow
the behaviour of a bubble column at high throughputs. II. Radial voidage profiles, **53**, 115
gas hold-up and liquid mixing at low and intermediate gas velocities. I. Air–water system, **53**, 167
liquid–liquid mass transfer in a reciprocating-plate column, **54**, 7
experimental study of the hydrodynamics of an isothermal liquid film flowing inside tubular columns with corrugated walls, **54**, 23
numerical study of the flow structure, under laminar regime, in a pipe with wavy wall, **55**, 15
Fluid
the stability of a compressible fluid with variable transport properties in a horizontal chemical vapour deposition reactor, **54**, 137
Fluidized bed
deterministic chaos: a new tool in fluidized bed design and operation, **53**, 75
analogous description of the hydrodynamics of gas–solid fluidized beds and bubble columns, **53**, 89
Fluidized bed reactor
kinetics of anaerobic digestion of cow manure with biomass immobilized on zeolite, **54**, B9
comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (S.S. Lele and J.B. Joshi, *Chem. Eng. J.*, *49* (1992) 89), **55**, 143
reply to 'Comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (D.G. Karamanev and C. Chavarie, *Chem. Eng. J.*, *55* (1994) 143), **55**, 145
deacidification of grape musts by *Schizosaccharomyces* entrapped in alginate beads: a continuous-fluidized-bed process, **55**, B29
Fuzzy calculus
a revitalization of chemical engineering knowledge with fuzzy calculus, **54**, 155

Gas
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
Gas flow
modelling and measurement of gas flow distribution in corrugated sheet structured packings, **53**, 55
Gas hold-up
gas hold-up and liquid mixing at low and intermediate gas velocities. I. Air–water system, **53**, 167
Gel
diffusional characteristics of a swelling gel and its consequences for bioreactor performance, **55**, B35
Gibbs free energy
predicting phase and chemical equilibrium using the convex hull of the Gibbs free energy, **54**, 187
Gravimetric measurement
influence of intergranular transfer on the gravimetric determination of adsorption kinetics, **53**, 147
Growth kinetics
modelling the inhibitory effect of 1,2-epoxyoctane on the growth kinetics of *Pseudomonas oleovorans*, **53**, 213

Heat transfer
effect of liquid coalescing properties on mass transfer, heat transfer and hydrodynamics in a three-phase fluidized bed, **55**, 1
a heat transfer correlation for liquid–solid flows in horizontal pipes, **55**, 39
coupling of laminar flow heat transfer in a vertical circular tube with external free convection, **55**, 103
Heterogeneous reaction
intraparticle diffusion and reaction kinetics as factors in catalyst particle design, **53**, 1
Hollow fibre
solution of hollow fibre bioreactor design equations: the case of power-law fluids, **55**, B73
Horizontal pipes
a heat transfer correlation for liquid–solid flows in horizontal pipes, **55**, 39
Hydrodynamics
hydrodynamics and local mass transfer characteristics of gas–liquid ejectors, **53**, 67
analogous description of the hydrodynamics of gas–solid fluidized beds and bubble columns, **53**, 89

experimental study of the hydrodynamics of an isothermal liquid film flowing inside tubular columns with corrugated walls, **54**, 23
numerical study of the flow structure, under laminar regime, in a pipe with wavy wall, **55**, 15
hydrodynamics of nearly flat base spouted beds, **55**, 27
Hydrodynamics fluidized bed
effect of liquid coalescing properties on mass transfer, heat transfer and hydrodynamics in a three-phase fluidized bed, **55**, 1
Hydrolysis
synthesis of fine spherical zirconia particles by controlled hydrolysis of zirconium alkoxide in the high temperature range above 50 °C, **55**, 93

Immobilized enzyme
design strategy and process optimization for reactors with continuous transport of an immobilized enzyme, **53**, B1
Immunoassay
characterization of antigen-coupled liposomes for homogenous immunoassay of polyclonal antibodies, **54**, B33
Impedance probe
the behaviour of a bubble column at high throughputs. II. Radial voidage profiles, **53**, 115
Inorganic substances
estimating the critical temperatures of inorganic substances, **54**, 147
Intergranular transfer
influence of intergranular transfer on the gravimetric determination of adsorption kinetics, **53**, 147
Intraparticle convection
effectiveness of bidisperse catalysts with convective flow in the macropores, **55**, 81
Ion exchange
modelling of K–Na exchange in fixed beds with highly concentrated feed, **54**, 17
Isopropylnaphthalenes
alkylation of naphthalene by propene with $BF_3.H_3PO_4$ catalyst in a three-phase system, **53**, 173

Kinetic behaviour
mass transfer and kinetic behaviour of chelated cadmium solutions, **53**, 183
Kinetic model
a kinetic model for growth of *Acetobacter aceti* in submerged culture, **54**, B15
Kinetics
kinetics of the quaternizations of tertiary amines with benzyl chloride, **53**, 107
kinetic study of the synthesis of poly(dibenzo-18-couronne-6) in an electrochemical reactor using a pulsed percolated porous electrode, **53**, 137
influence of intergranular transfer on the gravimetric determination of adsorption kinetics, **53**, 147
calculation of the kinetics of catalyst regeneration by burning coke following a temperature ramp, **54**, 35
kinetics of zeolite-catalysed toluene isopropylation, **54**, 79
mechanisms of nitriding electrolytic manganese metal, **54**, 167
kinetics of anaerobic digestion of cow manure with biomass immobilized on zeolite, **54**, B9
macroapproach kinetics of ethanol fermentation by *Saccharomyces cerevisiae*: experimental studies and mathematical modelling, **54**, 221
kinetics of an anaerobic fluidized bed system used for the purification of fruit processing waste-water, **54**, B25
an assessment of MSMPR crystallization kinetics data for systems modelled by size-dependent crystal growth rate functions, **55**, 69
Kinetics chemical vapour deposition
chemical vapour deposition as a novel technique for catalyst preparation; modelling of active phase profiles, **53**, 13

Lactose dissolution
a mathematical model for lactose dissolution, **53**, B25
Laminar flow
coupling of laminar flow heat transfer in a vertical circular tube with external free convection, **55**, 103
Laser-induced fluorescence
OH concentration fluctuations in turbulent natural gas jet flames, **53**, 39
Lemna gibba
removal of water pollutants by *Lemna gibba*, **54**, B41
Liposomes
characterization of antigen-coupled liposomes for homogenous immunoassay of polyclonal antibodies, **54**, B33
Liquid distribution
effect of vertical misalignment of liquid dispersion in bubble columns, **53**, 151
Liquid mixing
gas hold-up and liquid mixing at low and intermediate gas velocities. I. Air–water system, **53**, 167
Liquid phase axial dispersion
tracer experiments in fixed beds: effects of flow maldistribution on the estimation of transport kinetic parameters, **53**, 193
Liquid solid flow
a heat transfer correlation for liquid–solid flows in horizontal pipes, **55**, 39

Manganese
mechanisms of nitriding electrolytic manganese metal, **54**, 167
Mass transfer
hydrodynamics and local mass transfer characteristics of gas–liquid ejectors, **53**, 67
mass transfer and kinetic behaviour of chelated cadmium solutions, **53**, 183
liquid–liquid mass transfer in a reciprocating-plate column, **54**, 7
liquid–solid mass transfer in a batch-packed bubble column, **54**, 51
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
effects of adsorption on mass transfer in immobilization matrices, **54**, B1
effect of liquid coalescing properties on mass transfer, heat transfer and hydrodynamics in a three-phase fluidized bed, **55**, 1
comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (S.S. Lele and J.B. Joshi, *Chem. Eng. J.*, *49* (1992) 89), **55**, 143
reply to 'Comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (D.G. Karamanev and C. Chavarie, *Chem. Eng. J.*, *55* (1994) 143), **55**, 145

Mass transfer coefficient
enzyme mass transfer coefficient in a sieve plate extraction column, **55**, B1
Mathematical model
a mathematical model for lactose dissolution, **53**, B25
Mathematical modelling
comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (S.S. Lele and J.B. Joshi, *Chem. Eng. J.*, *49* (1992) 89), **55**, 143
reply to 'Comments on "Modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters" (D.G. Karamanev and C. Chavarie, *Chem. Eng. J.*, *55* (1994) 143), **55**, 145
Measurement
modelling and measurement of gas flow distribution in corrugated sheet structured packings, **53**, 55
Membrane
azeotropic mixtures may be broken by membrane distillation, **54**, 87
Methanol
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
Microbial growth
a kinetic model for growth of *Acetobacter aceti* in submerged culture, **54**, B15
Mixing
effect of vertical misalignment of liquid dispersion in bubble columns, **53**, 151
the attainable region for systems with mixing and multiple-rate processes: finding optimal reactor structures, **54**, 175
Modelling
a grain size distribution model for non-catalytic gas–solid reactions, **53**, 25
the effects of oscillatory feeding of CO and O_2 on the performance of a monolithic catalytic converter of automobile exhaust gas: a modelling study, **53**, 47
modelling and measurement of gas flow distribution in corrugated sheet structured packings, **53**, 55
microscopic modelling of electrothermal desorption, **53**, 157
modelling the inhibitory effect of 1,2-epoxyoctane on the growth kinetics of *Pseudomonas oleovorans*, **53**, B13
modelling of K–Na exchange in fixed beds with highly concentrated feed, **54**, 17
mechanisms of nitriding electrolytic manganese metal, **54**, 167
mathematical modelling of batch and continuous bacterial leaching, **54**, 207
macroapproach kinetics of ethanol fermentation by *Saccharomyces cerevisiae*: experimental studies and mathematical modelling, **54**, 221
evaporation loss from solvent tanks, **55**, 61
an assessment of MSMPR crystallization kinetics data for systems modelled by size-dependent crystal growth rate functions, **55**, 69
Morphology
studies on the morphology of immobilized catalase, **55**, B41
MSMPR
an assessment of MSMPR crystallization kinetics data for systems modelled by size-dependent crystal growth rate functions, **55**, 69
Naphthalene
alkylation of naphthalene by propene with $BF_3.H_3PO_4$ catalyst in a three-phase system, **53**, 173
Natural gas flames
OH concentration fluctuations in turbulent natural gas jet flames, **53**, 39

o-Nitrophenol
effects of adsorption on mass transfer in immobilization matrices, **54**, B1
Optimisation
design strategy and process optimization for reactors with continuous transport of an immobilized enzyme, **53**, B1
Optimization
the attainable region for systems with mixing and multiple-rate processes: finding optimal reactor structures, **54**, 175
Oxidation
the effects of oscillatory feeding of CO and O_2 on the performance of a monolithic catalytic converter of automobile exhaust gas: a modelling study, **53**, 47

Packing
modelling and measurement of gas flow distribution in corrugated sheet structured packings, **53**, 55
Parameter
a vapour pressure correlation for polar substances based on four-parameter corresponding states, **55**, 139
Particle
synthesis of fine spherical zirconia particles by controlled hydrolysis of zirconium alkoxide in the high temperature range above 50 °C, **55**, 93
Particle settling velocity
a non-parametric method for particle settling velocity determination in a slurry bubble column, **54**, 1
Pentachlorophenol (PCP)
effects of adsorption on mass transfer in immobilization matrices, **54**, B1
Phase equilibrium
predicting phase and chemical equilibrium using the convex hull of the Gibbs free energy, **54**, 187
Polar substance
a vapour pressure correlation for polar substances based on four-parameter corresponding states, **55**, 139
Pollutant
removal of water pollutants by *Lemna gibba*, **54**, B41
Polymers
kinetic study of the synthesis of poly(dibenzo-18-couronne-6) in an electrochemical reactor using a pulsed percolated porous electrode, **53**, 137
Pressure
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
Process data
the use of connectionist systems to reconcile inconsistent process data, **54**, 125
Propene
alkylation of naphthalene by propene with $BF_3.H_3PO_4$ catalyst in a three-phase system, **53**, 173
Protein
separation of protein mixtures by continuous annular chromatography with step elution, **55**, B19
Pseudomonas oleovorans
modelling the inhibitory effect of 1,2-epoxyoctane on the growth kinetics of *Pseudomonas oleovorans*, **53**, B13

Purification
kinetics of an anaerobic fluidized bed system used for the purification of fruit processing waste-water, **54**, B25
PVC
pyrolysis kinetics of waste PVC at high conversion, **55**, 87
Pyrolysis
pyrolysis kinetics of waste PVC at high conversion, **55**, 87

Quaternization
kinetics of the quaternizations of tertiary amines with benzyl chloride, **53**, 107

Radial voidage
the behaviour of a bubble column at high throughputs. II. Radial voidage profiles, **53**, 115
Rate equation
on the estimation of size-dependent crystal growth rate functions in MSMPR crystallizers, **53**, 125
Reaction kinetics
intraparticle diffusion and reaction kinetics as factors in catalyst particle design, **53**, 1
a grain size distribution model for non-catalytic gas–solid reactions, **53**, 25
a mathematical model for lactose dissolution, **53**, B25
the effect of intraparticle convection on conversion in heterogeneous isothermal fixed-bed reactors with large-pore catalysts for first-order reactions, **54**, 41
reaction kinetics of COS with primary and secondary amines in alcoholic solutions, **55**, 53
Reactor
design strategy and process optimization for reactors with continuous transport of an immobilized enzyme, **53**, B1
the attainable region for systems with mixing and multiple-rate processes: finding optimal reactor structures, **54**, 175
Reciprocating-plate column
liquid–liquid mass transfer in a reciprocating-plate column, **54**, 7
Revitalization
a revitalization of chemical engineering knowledge with fuzzy calculus, **54**, 155

Separation
separation of protein mixtures by continuous annular chromatography with step elution, **55**, B19
Shrinking
an exact solution of the diffusion equation with shrinking, **55**, 135
Sludge digester
comparison between dynamics and control performance of mesophilic and thermophilic anaerobic sludge digesters, **55**, B55
Slurry
observations on induced aeration in agitated slurries, **54**, 199
Solvent tank
evaporation loss from solvent tanks, **55**, 61
Spouted bed
hydrodynamics of nearly flat base spouted beds, **55**, 27
Stability
the stability of a compressible fluid with variable transport properties in a horizontal chemical vapour deposition reactor, **54**, 137
upper limits to the stability characteristics of a continuous stirred-tank bioreactor fed with an inhibitory substrate, **55**, B47
Steady-state behaviour
steady-state behaviour of an aerobic mixed culture growing on phenol in a continuous stirred reactor, **53**, B47
Stirred-tank reactor
rheological and morphological properties of submerged citric acid fermentation broth in stirred-tank and bubble column reactors, **53**, B35
Stirred reactor
steady-state behaviour of an aerobic mixed culture growing on phenol in a continuous stirred reactor, **53**, B47
Subcritical mixtures
an improved method for predicting the vapor–liquid equilibria of subcritical mixtures, **55**, 115
Suspension
critical suspension conditions in stirred crystallizers, **55**, 45
Synthesis
kinetic study of the synthesis of poly(dibenzo-18-couronne-6) in an electrochemical reactor using a pulsed percolated porous electrode, **53**, 137
synthesis of fine spherical zirconia particles by controlled hydrolysis of zirconium alkoxide in the high temperature range above 50 °C, **55**, 93

Temperature
mass transfer characteristics of gases in methanol and ethanol under elevated pressures and temperatures, **54**, 63
Tertiary amines
kinetics of the quaternizations of tertiary amines with benzyl chloride, **53**, 107
Thermodynamics
evaporation loss from solvent tanks, **55**, 61
Tracer experiments
tracer experiments in fixed beds: effects of flow maldistribution on the estimation of transport kinetic parameters, **53**, 193
Transport kinetics
tracer experiments in fixed beds: effects of flow maldistribution on the estimation of transport kinetic parameters, **53**, 193
Transport properties
the stability of a compressible fluid with variable transport properties in a horizontal chemical vapour deposition reactor, **54**, 137
Turbulence
OH concentration fluctuations in turbulent natural gas jet flames, **53**, 39

Vapor–liquid equilibria
an improved method for predicting the vapor–liquid equilibria of subcritical mixtures, **55**, 115
Vapour pressure
a vapour pressure correlation for polar substances based on four-parameter corresponding states, **55**, 139
Vertical misalignment
effect of vertical misalignment of liquid dispersion in bubble columns, **53**, 151

Waste disposal
pyrolysis kinetics of waste PVC at high conversion, **55**, 87
Waste-water
kinetics of an anaerobic fluidized bed system used for the purification of fruit processing waste-water, **54**, B25
Wavy wall geometry
numerical study of the flow structure, under laminar regime, in a pipe with wavy wall, **55**, 15
Xanthan gum
apparent yield stress in xanthan gum solutions at low concentrations, **53**, B41
Yeast
microbial cell disruption: role of cavitation, **55**, B67
Yield stress
apparent yield stress in xanthan gum solutions at low concentrations, **53**, B41
